UI/UX Developer

EMPLOYMENT HISTORY

UI/UX Developer - Mobikasa   **Sept 2014 - Present**

Under this designation I was responsible for designing and developing multiple websites ranging from WordPress blogs to Ecommerce Platforms based on Magento and Shopify across various stages, such as prototyping through Wire-Frames and Mock-Ups, Development and Coordinating with the client to achieve the desired results, and testing for cross-browser & cross-platform compatibility.

Here are some projects that I worked on

1. **Holland & Sherry** | *http://www.hollandandsherry.com*
   Holland & Sherry Ltd are Internationally renowned Cloth Merchants of Distinction established in 1836, providing the finest cloths in the world. As the lead front end developer of this project, I was responsible for communicating with the client and constructing the front-end experience for the project, from the beginning over to the maintenance phase of the project.

2. **L'Objet** | *http://www.l-objet.com*
   L'Objet strives to create luxurious & functional designs for the home. It is devoted to craftsmanship and artisan techniques. As a part of a team, I helped create the front-end of the project and handled issues such as Responsive Web Design, cross-browser compatibility and cross-platform performance.

3. *TravelBeauty* | *http://www.travelbeauty.com*
   Travel Beauty offers a unique selection of hard to find luxury beauty & grooming products from around the globe. Working in a team, I helped create an e-commerce platform for our client which caters to customers globally.

4. *GlassyPeople* | *http://www.glassypeople.com*
   GlassyPeople is an online shop for stylish casual eyeglasses and professional eyeglasses at extremely affordable prices. Working in a team, I helped create an e-commerce platform for our client, and also handled routinely scheduled client calls.

5. *JMA India* | *http://www.jma-india.myshopify.com*
   JMA Group is one of the largest companies in Automobile Spare parts distribution in India. Working in a team, I helped create an ecommerce platform for our client.
